STAMVS NETWORKS

Know more. Respond sooner. Mitigate risk.

Stamus Networks believes in a world where defenders are heroes, and a future where those they protect remain safe. As defenders face an onslaught of threats from well-funded adversaries, we relentlessly pursue solutions that make the defender's job easier and more impactful.

A global provider of high-performance network-based threat detection and response systems, Stamus Networks helps enterprise security teams accelerate their response to threats with solutions that uncover serious and imminent risk from cloud and on-premise network activity. Our solutions are advanced network detection and response (NDR) systems that expose threats to critical assets and empower your rapid response.

GUIDING PRINCIPLES

Deliver the most useful detection, period

Celebrate the defenders

Avoid hype, fear and exaggeration

Embrace open interfaces and open source

Apply the right technology to the right problems

Show respect and integrity in everything we do

WHY NETWORK DETECTION AND RESPONSE

The network does not lie. In fact, the network holds the ground truth for an enterprise's security posture. Even as more organizations shift to cloud-based resources, encrypted transmission, and remote workforces, nearly all cyber threats generate communications that can be observed on the network.

At Stamus Networks, we tap into the inherent power of network traffic to uncover every possible threat to your organization. We offer the best possible asset-oriented visibility and automated detection to help practitioners cut through the clutter and focus on only those serious and imminent threats.

Stamus Security Platform

Stamus Security Platform is a broad-spectrum, open network-based threat detection and response (NDR) system that delivers actionable network visibility and threat detection with:

- Greater visibility & evidence
- More complete detection
- Response-ready notifications
- Extensible threat intelligence
- Straightforward integrations
- Immediate results

Stamus Security Platform is trusted by some of the world's largest organizations, including government CERTs, central banks, insurance providers, managed security service providers, financial service providers, multinational government institutions, broadcasters, travel and hospitality companies, and even a market-leading cybersecurity SaaS vendor.

▶ WHAT MAKES STAMUS NETWORKS DIFFERENT?

Greater visibility into threats & activity - By using multiple detection technologies and guided threat hunting you'll uncover even the weakest attack signals and unauthorized activities.

Privacy-protecting and secure deployment options - Optionally deploy our central analytics system on your premise or datacenter, so you do not ship sensitive information to a SaaS-based analytics system. Additionally, SSP may be deployed in a completely air-gapped environment.

Use our probes and/or your Suricata sensors - Supercharge your existing Suricata deployment? Start with your Suricata sensors, while you transition to the more advanced Stamus Network Probes.

Transparent detections with detailed evidence - Understand exactly what triggered an event with a detailed attack timeline along with all the evidence needed to respond quickly and stop a breach before damage is done.

Open and extensible for your environment - Augment built-in detections with third party threat intel and signatures or develop your own custom detections. Easily integrate into your security tech stack.

Built for enterprise-scale operations - Scales from a small stand-alone instance to multi-site, multi-100Gbps deployments integrated into your SOC/SIEM/SOAR while tracking activity of millions of hosts.

ABOUT STAMUS NETWORKS

Stamus Networks believes in a world where defenders are heroes, and a future where those they protect remain safe. As organizations face threats from well-funded adversaries, we relentlessly pursue solutions that make the defender's job easier and more impactful. The global leader in Suricata-based network security solutions, Stamus Networks helps enterprise security teams know more, respond sooner and mitigate their risk with insights gathered from cloud and on-premise network activity. Our Stamus Security Platform combines the best of intrusion detection (IDS), network security monitoring (NSM), and network detection and response (NDR) systems into a single solution that exposes serious and imminent threats to critical assets and empowers rapid response.
